Assignment -4

Assignment Date	24 Oct 2022
Student Name	BITU KUMAR
Student Roll Number	19ECO10
Maximum Marks	2 Marks

Question:

Write a Code and Connections in wokwi for **ultrasonic sensor**. Whenever distance is less than 100 cms send "alert" to ibm cloud and display in device recent events

Code:

```
#include <WiFi.h>//library for wifi
#include <PubSubClient.h>//library for MQtt
WiFiClient wifiClient;
String data3;
#define ORG "g05aq3"
#define DEVICE_TYPE "selva"
#define DEVICE_ID "selva_assignment_4"
#define TOKEN "qwertyuio"
#define speed 0.034
#define led 14
char server[] = ORG ".messaging.internetofthings.ibmcloud.com";
```

```
char clientId[] = "d:" ORG ":" DEVICE_IYPE ":" DEVICE_ID;
char publishTopic[] = "iot-2/evt/selva/fmt/json";
                                                                                                                                       PubSubClient client(server, 1883, wifiClient);
                         char topic[] = "iot-2/cmd/status/fmt/String";
                                                      char authMethod[] = "use-token-auth";
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       pinMode(trigpin, OUTPUT);
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  pinMode(echopin, INPUT);
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             pinMode(led, OUTPUT);
